LLM pretraining / Data selection / Training dynamics

## Education

**Fudan University**  
BE in Software Engineering

Shanghai, China  
Sep 2023 - Present

## Selected Publications

### Towards Efficient LLMs Annealing with Principled Sample Selection

Yuanjian Xu, Jianing Hao, **Wanbo Zhang**, Zhong Li, and Guang Zhang.

#### ICML 2026 Spotlight.

Helped formulate the constrained sample-selection objective and analyze optimization dynamics across LLM training stages.

### UniG2U-Bench: Do Unified Models Advance Multimodal Understanding?

Zimo Wen, Boxiu Li, **Wanbo Zhang**, Junxiang Lei, Xiaoyu Chen, Yijia Fan, Qi Zhang, Yujiang Wang, Lili Qiu, Bo Li, Ziwei Liu, Caihua Shan, Yifan Yang, and Yifei Shen.  
arXiv:2603.03241, 2026.

Contributed benchmark evaluation, data analysis, and writing for a study covering 7 regimes, 30 subtasks, and more than 30 models.

### Game-Theoretic Lens on LLM-based Multi-Agent Systems

Jianing Hao, Han Ding, Yuanjian Xu, Tianze Sun, Ran Chen, **Wanbo Zhang**, Guang Zhang, and Siguang Li.  
arXiv:2601.15047, 2026.

## Research Experience

### Data Strategist Intern | WILL Lab Wizard Quant May - Aug 2026

- Investigated data-centric methods for LLM pretraining and annealing, spanning data curation, sample selection, optimization analysis, and training-framework experiments.
- Studied how data composition and optimization dynamics across warmup, stable training, and learning-rate decay shape model capability formation.

## Open Source Projects

### Argus Core Developer | Jan 2026 - Present

Open-source runtime for persistent, reviewed autonomy in long-horizon research and engineering. [GitHub](#) | [Technical report](#)

- Co-developed the Manager-Planner-Engineer-Reviewer workflow for long-running tasks with durable state, verification, and evidence-gated iteration.
- Built infrastructure for planning, execution, review, persistent memory, and multi-day GPU experiments.

## Research Projects

### Rethinking Domain Partition for LLM Data Mixing Ongoing

A multi-task learning perspective on domain definitions and mixture design.

### Reasoning Data Selection from a Small-World Network Perspective Ongoing

## Additional Information

Third Prize, Fudan University Outstanding Undergraduate Scholarship, 2024-2025.

Second Prize, Shanghai Undergraduate Computer Application Ability Competition.

**Selected coursework** Algorithms (A), Artificial Intelligence (A), Python Programming (A), Computer Vision (A), Data Structures, and Mathematical Foundations of AI.

**Programming** Python, C/C++ **Frameworks and tools** PyTorch, Transformers, Hugging Face, Linux, Git
